PROFESSIONAL PROFILE

Full-stack developer with over 1 year of experience across the full web application development lifecycle, from requirements gathering to implementation and deployment. Proficient in React, Node.js, Python, and MySQL. Results-driven, with experience applying agile methodologies, scalable architectures, and version control with Git. Interested in contributing to agile development teams and in roles with a path toward technology management.

PROFESSIONAL EXPERIENCE

Freelance Development — Livestock Management Systems | Full-Stack Developer *Feb 2026 – May 2026*

Swine management system:

- Took part in developing a pig batch control system (registration, purchase/sale, and inventory traceability) using PHP, React, and MySQL.
- Collaborated on implementing a feed inventory module with daily consumption reports per batch.
- Contributed to building a user management system with access control.
- Took part in designing a full-batch analysis module to support decision-making.

Cattle management system:

- Collaborated on developing an individual animal record module with a complete event history.
- Took part in implementing a pasture rotation module.
- Contributed to building a calving and reproductive event tracking log per cow.

Cafioocidente | Junior Developer *Jan 2025 – Jul 2025*

- Designed and implemented an electronic equipment inventory system (frontend + backend), reducing asset lookup time by ~60% compared to the previous manual process.
- Developed a member information lookup module with user authentication, improving the availability and security of internal data.
- Implemented an automatic trip pricing system for cooperative agencies, generating digital payment receipts and eliminating the manual process.
- Ran periodic backup routines for accounting information, ensuring operational continuity and compliance with data security policies.

SENA | Software Developer (institutional project) *Jan 2024 – Dec 2024*

- Built a web-based access control application (registration of people and vehicles) with role-based user authentication (RBAC), used in production by the educational center.
- Applied SOLID principles and MVC patterns to ensure system maintainability and scalability.
- Managed version control with Git using conventional commits and feature branching.

EDUCATION

SENA | Associate Degree in Software Analysis and Development *2023 – 2024*

Emphasis on web development, relational databases, software architecture, and agile methodologies (Scrum).

TECHNICAL SKILLS

Frontend: HTML5 / CSS3, JavaScript, React, Tailwind CSS
Backend: Node.js, Express.js, Flask, PHP, Python, FastAPI
Databases: MySQL, PostgreSQL
Tools: Git, GitHub, Figma, Postman, AppSheet
Methodologies: Scrum / Agile, REST APIs, MVC, version control
English: Basic-Intermediate (A2-B1), Spanish (native)
